Full Stack Web developer

Full Stack Web Developer with over 2 years of official experience in building modern web applications using Django, ReactJS stack. I work across both backend and frontend, creating seamless user experiences and robust functionalities. With Tailwind CSS, I ensure every interface is clean, responsive, and visually polished. Focused on writing efficient code and delivering reliable, user-centered solutions.

Education

Sep 2016 - Jul 2018

- **Baccalaureate in Experimental Science Field**
Lamine Debaghine High School, Hraoua -Algiers

Sep 2018 - Jul 2021

- **Licence In Software engineering**
University of Science and Technology USTHB, Bab Ezzouar - Algiers
 - Sufficient knowledge in fundamental computer science and networks.
 - Understanding of organizations (environment, structure, functions, etc.) and their three systems (management system, information system (IS), management system).
 - Master the entire development cycle of an IS from needs analysis to the implementation of the operational IS, based on the knowledge of modern design methodologies, software development techniques, and databases (core of IS).
 - Acquire the skills required for software development and testing.

Sep 2021 - Jul 2023

- **Master In Software engineering**
University of Science and Technology USTHB, Bab Ezzouar - Algiers
 - Proficient in database management and design, including data warehousing and design patterns.
 - Experienced in system modeling and compiling systems.
 - Skilled in web development, including both front-end and back-end technologies.

Employment
