Professional Summary

Full-Stack Software Engineer with 3+ years of experience building production-grade web applications using **Django**, **Django REST Framework**, **PostgreSQL**, and **React.js**. Strong experience implementing complex business logic, optimizing database queries, and designing scalable APIs. Comfortable working in fully remote environments with strong communication skills and ownership mindset.

Technical Skills

- **Frontend:** React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS
 - **Backend:** Django (Python), DRF, RESTful APIs, JWT
 - **Databases & Caching:** PostgreSQL, MySQL, SQL Server, Redis
 - **Tools & CMS:** Git, WordPress, Wagtail CMS, cPanel, Figma, Adobe XD
-

Professional Experience

Software Engineer – Frontend Web Developer — National Employment Agency (ANEM), Algiers
Dec 2024 – April 2026

- Frontend developer on the reinvention of the **Wassit Online employment platform**, improving usability and accessibility.
- Contributed to the redesign and development of **name.anem.dz**, implementing modern UI components.
- Built responsive interfaces using **React.js** and **Tailwind CSS** in collaboration with UX/UI teams.
- Integrated frontend applications with secure **REST APIs** developed in .NET.
- Participated in code reviews, performance optimization, and cross-functional collaboration.

Web Development Trainer (Beginner Level) — Independent *Aug 2024 – Dec 2024*

- Delivered beginner-level web development training covering HTML, CSS, and JavaScript fundamentals.
- Designed hands-on exercises and small projects to help learners build practical skills.
- Introduced best practices in responsive design and clean code.

Full Stack Web Developer — DIVATECH, Mohamadia, Algiers
May 2023 – Aug 2024

- Designed and developed a modular ERP system covering inventory, HR, accounting, and project management.
- Built a custom CRM platform to improve customer engagement, tracking, and reporting.
- Implemented full-stack features using **Django**, **React.js**, JavaScript, and SQL databases.
- Enhanced system scalability, security, and data accuracy using clean architecture principles.

Backend Developer Intern (Graduate Project) — CERIST, Algiers *Jan 2023 – Jul 2023*

- Developed backend services using Django and Python.
 - Applied system modeling techniques and database schema design.
 - Managed integration between frontend and backend layers.
-

Selected Freelance & Personal Projects

- **Palace of Languages** — Built a Django & Wagtail CMS platform with custom models and dynamic content management workflows.
 - **Digital Skills Platform** — Developed a freelance marketplace using **Django, DRF, and React**, implementing REST APIs with custom serializers, filtering, pagination, and role-based business logic.
 - **Skiller Recruit** — Built a recruitment platform with **Django REST Framework**, designing serializers for structured CV data, validation, and scalable backend logic.
 - **DivaLootShop (E-commerce)** — Developed an e-commerce platform using **Django & DRF**, implementing secure multi-method payment workflows, order management APIs, and optimized database queries.
-
